CptS 322 Software Engineering Principles I

Spring 2018

Project Milestone 0
(Due Monday/ January 22, 2018 on Blackboard)

Assessment criterion:
- Github setup
  - Each team member has a working account on Github
    - Set up your GitHub account, using your EECS account, on https://github.eecs.wsu.edu
    - Should you have difficulties in setting up this account, consult EECS Help Desk (located in Sloan Hall 358, phone number 509-335-6773).
  - Create a repository for this course project
    - Add a README for the project, stating what this project is about and the team info, etc.
    - Since this is a team project, only one team member needs to create the project on GitHub, with others added as collaborators.
    - Add the TA as a collaborator too.
- Team creation – <u>with following information submitted</u> only by the contact person of the team:
  - Team name
    - Please make it meaningful (hint: it could be the initials of team member first-names plus '-{your project name}').
  - Team member names and EECS accounts (with those of the contact person marked)
    - Later the contact person will communicate on behalf of the team with the TA and instructor on Piazza/email
    - In future Piazza/email correspondences as a team, always start the subject with the team name
  - Project name and GitHub repository address (URL link)
    - It is recommended that the team name is used as the repository name on GitHub as well.

Note: each team submission, although undertaken by the contact person, will be graded for a team, meaning that all members will equally receive the score of the submission.

Please use the following format for the submission of team info:

Team name	JTMMPB	
Project title	A web-based electronic voting system	
Project repository	https://github.eecs.wsu.edu/jtmmpb/evoting	
Team members	**Names**	**EECS account**
	Jason Mars	jason.mars
	Tom Hank	tom.hank
	Martin Luther	martin.luther
	Mike Jordan	mike.jordan
	Patrick Jenkins	patrick.jenkins
	Barack Obama	barack.obama
